Re: Mr Mark Wallace, Sterling Building Systems Ltd,
Unity House, Buntsford Park Road, Bromsgrove, Worcestershire, B60 3DXY

25th June 2007

To Whom It May Concern:

NRFC Safety in Roofing Awards

It is with great pleasure that I confirm Sterling Building Systems Ltd achieved a Gold Award in the 2006 Safety in Roofing Awards.

These awards have run for a number of years and are seen as an effective means of promoting a positive attitude to health and safety amongst our member companies.

The standard has risen considerably over recent years and NFRC judges continually raise the bar to incorporate legislation and its own guidance to members. The judges look for evidence of good practice, training and an up-to-date health and safety policy and review job specific method statements/safe system of work. The judges also look at Risk assessments, COSHH assessments, any PPE that is provided, responsible persons, performance information and any enforcement action taken.

The application criteria for submission is very strict and I cannot stress enough how hard it is to receive any award, and therefore to achieve a Gold award is a superb accomplishment. We are only too happy to endorse this company and praise their health & safety policy and practices.

Yours sincerely

Ray Horwood CBE
